

FORENSIC SAMPLE ANALYSIS

ANALYSIS FOR JUSTICE

FORENSIC SAMPLE ANALYSIS

We at Allele Life Sciences Private Limited deal with sensitive biological, chemical, trace evidence, hairs, fibres, glass, paint, wood, explosives, fire debris, flammable liquids and motor vehicle lamps, evidences for various purposes, drugs on biological systems. Specifically, forensic toxicology focuses on the detection of alcohol, drugs, and other toxic substances in the human body.

We have well equipped state of art laboratories involved for executing the same. DNA testing can be the single most important factor used by the courts to determine guilt or innocence . We utilises a consultative approach to handling cases that promotes a high level of client-to-scientist interaction.
